## Expectations

At the mid-semester project proposal and upon project completion, each group member will evaluate every other member of the project team. The following rubric (left table) will be used in the assessment process. The additional expectations (right table) may be filled in and agreed upon by all group members, but will not be graded.

**CONSEQUENCES:** In addition to contributing to each student's final project grade, students may vote to remove one of their peers from the group if that person is not properly contributing and/or hindering the progress of the entire group or individual group members (subject to instructor review). Alternatively, a student may elect to leave their group, completing a final project with all of the same requirements as a full group project on their own, subject to instructor approval. *No group changes may be made before mid-semester break.*

**NOTE:** Peer assessments may retroactively affect a student's grade for prior group deliverables. For example, if it is shown that a student did not appropriately contribute to the work of a milestone deliverable, the student will only receive a portion of the original group milestone grade, subject to instructor discretion based on available information.
